

PACKAGED WATER TREATMENT SOLUTIONS

For over 20 years, Pall Water has provided municipal and industrial customers with reliable water treatment solutions to meet their most complex water challenges.

For your specific needs, Pall has developed a family of membrane based pre-engineered, packaged solutions to provide the water you need.

Our Aria FIT systems are pre-engineered and are factory-tested. The modular design can be configured to fit your footprint, budget and overall project schedule.

QUICK FACTS

- Processing over 1,500 MGD / 7 million m³ of water every day
- Over 1,200 systems sold
- Over 70,000 modules installed
- Over 3,800 years of combined systems operation

PRE-ENGINEERED, PACKAGED SOLUTIONS

aria^{fit}[™]

Across the globe, Pall Water has a proven track record in multiple industrial and municipal water treatment applications including but not limited to:

Industrial

- Water reuse and recycling
- RO and IX pre-treatment
- Boiler feed water
- Cooling tower feed water
- Mining and process water

Municipal

- Drinking water
- Ground water
- Water reuse and recycling
- Wastewater treatment
- Boiler feed water

MODULAR DESIGN

Our modular, packaged systems are configurable to meet your needs today and easily expandable to meet your needs of tomorrow. Various possible configurations allow to optimize not only your available space but also performance at low total cost of ownership.

SMART SOLUTION

Thanks to intelligent diagnostics and automated controls, you can monitor system performance and proactively identify potential issues. In addition, a simplified and intuitive process design ensures an easy systems operation, optimization and minimal maintenance.

RELIABLE PERFORMANCE

Aria™ FIT systems are designed to handle variations of incoming water conditions while maintaining productivity and high filtrate quality under all circumstances. They incorporate proven hollow-fiber, TIPS membranes known for long life and ease of use. With a proven track record in thousands of systems sold, our membrane technology is the core element that ensures a long life cycle and a high, reliable performance of the systems.

Whether you need a system for the treatment of safe drinking water or water for your industrial processes – Pall Water can provide a wide range of membrane based pre-engineered, packaged solutions from 5 gpm up to more than 2 MGD (1 – 360 m³/h) or more.

Our **Aria™ CARE** service team is available to support you through the whole system life cycle — during installation, commissioning and for special requests at any time.
