

Pall FSI™ Filter Bags

prelude™

DESCRIPTION

Pall FSI filter bags set the bar for quality; capable of withstanding higher solids loading while reducing waste volume. With a wide range of options, the Pall FSI filter bags are the optimal solution to achieve your water treatment needs.

Material compatibility at your fingertips: Intake water quality can vary, increasing the risk of contaminant bypass which can place strain on your system. Pall offers an array of materials including polypropylene to polyester to select based upon your incoming water characteristics thus increasing the performance of your system.

Flexibility with micron rating and sizes: Filter bags are available in multiple sizes and micron ratings. These combined aspects will result in an ideal solution to achieve flow, efficiencies and product desired.

Customized configurations increasing security: From traditional sewn to Polyweld® welded seam to seamless filter bag configurations combined with PolyLoc® flange, the product quality is unmatched. NSF61 certified options available.

APPLICATIONS

- Drinking Water
- Wastewater
- Desalination
