

# Pall Filter Housings

prelude™

## DESCRIPTION

Pall Water **Filter Cartridge Housings** and **Filter Bag Housings** are optimally designed for all types of water. Different water applications have different requirements in terms of equipment and filter media. Pall Water has both to meet your needs.

**Multiple materials of construction:** Ranging from plastic to several types of stainless-steel alloys, chemical compatibility of the housing to your water reduces the potential for housing failures that can cause the shutdown of your facility.

**Configurable inlet / outlet nozzles:** From type 1 to type 15, positions of the nozzles will allow setup for any water system and can be rotated or relocated to meet your individual needs.

**Unlimited number of filters:** Housings are available in small or large configurations, which allow for any number of bag filters or cartridge filters you want. This will help reduce the shelf life and change-out specifications based upon your water quality.

## APPLICATIONS

- Drinking Water
- Wastewater
- Desalination
- Drainage Water / Leachate
- Utility Water
- And More...

## MORE INFORMATION

Scoping the right housing for your application requires some critical criteria. These criteria will ensure Pall Water can provide you with the best solution to meet your needs, while minimizing the risk of downtime due to housing failures.

### FILTER HOUSING CRITERIA

<b>Water Temperature:</b>	32°F – 212°F (0°C – 100°C)
<b>Water Flow Rate:</b>	GPM, GPD, LPM, LPD
<b>Type of Filters:</b>	Cartridge Filter or Bag Filter
<b>Micron Rating of Filter:</b>	1 µm – 100 µm
<b>Efficiency Rating of Filter:</b>	Absolute or Nominal
<b>End Configuration of Cartridge Filter:</b>	DOE or SOE
<b>Housing Material of Construction:</b>	Plastic or Steel (Specify Type of Steel Required)
<b>Housing Inlet / Outlet Orientation:</b>	Orientations 1 – 15 Available
<b>Housing Inlet / Outlet Connection Size &amp; Type:</b>	Flanged, Threaded, Aseptic, etc.
